

**Editor's Comment:**

My editorial decision is "to accept the manuscript to be published in the AJRID after making the following revision".

Author(s) needs to revise the following:

(1) At Page number (4), under the heading of operational definition of variables, author(s) said that The independent variable in this study was COVID-19 vaccination. Actually it must be a dependent variable; not an independent variable. (Let them check the title of their study!) It could be considered a fatal mistake (typing error)!

(2) At page number (5), in the results section, what does "instruction" mean? See Table (1). Author should describe the operational definition of it.

**Editor's Details:**

Dr. Win Myint Oo  
Associate Professor, Sibul Clinical Campus, SEGi University, Malaysia.
