

Editor's Comment:

Only with the recommendation that the referencing in the text of the document be standardized to that used by the JERR Journal. For example, the references Hassan (2024) and (Adigwe, 2024; Isabel, 2024), should be written as (Hassan 2024) and (Adigwe 2024, Isabel 2024). And so for the rest of the references. I recommend the author to see articles published by JERR.

Correcting the above, I believe that the article can be put into the publication process.
