

Review Form 3

Journal Name:	Journal of Engineering Research and Reports
Manuscript Number:	Ms_JERR_130153
Title of the Manuscript:	Investigating the Feasibility and Risks of Leveraging Artificial Intelligence and Open Source Intelligence to Manage Predictive Cyber Threat Models
Type of the Article	Research

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript addresses a critical and timely issue in cybersecurity, exploring the use of AI and open-source intelligence to predict and manage cyber threats. Given the increasing frequency and complexity of cyberattacks, the findings could provide valuable insights into improving security measures. It also opens avenues for further research into the integration of AI technologies with intelligence gathered from open-source platforms.	Thanks for the comments.
Is the title of the article suitable? (If not please suggest an alternative title)	The title is appropriate as it clearly reflects the subject matter.	Thanks for the comments.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract gives a good summary. It could be better if a pinch of methodology and key findings are added e.g. outlining the predictive models or AI techniques.	Thanks for the comments.
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically sound, providing a good analysis of the use of AI and open-source intelligence.	Thanks for the comments.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are adequate.	Thanks for the comments.
Is the language/English quality of the article suitable for scholarly communications?	The language is clear and mostly well-written.	
Optional/General comments	I would advise adding some real-world case studies of AI and open-source intelligence being used in cybersecurity to illustrate the feasibility and potential risks more effectively to the article.	Thanks for the comments.

Review Form 3

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
