#### **PART 1: Comments**

	<b>Reviewer's comment</b>	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	Hemoprotzoan diseases are a major threat in animal health and productivity. It results in death and loss of production in animals. These are usually spread by insect vectors. Hence its prevalence, distribution, spread & control measures in an geographical area is important. This manuscript provides a description to the above mentioned problem and hence is important in scientific community	
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	<b>A study of Bovine trypanosomiasis in the peri-urban zone of Bamako (Mali) from 2007-2009</b>	
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	It is alright but spelling mistakes needs attention and mention what is TAA in full atleast once	
<b>Is the manuscript scientifically, correct? Please write here.</b>	There is a need of correction in graph (figure 2) and in methodology mention the anticoagulant used. Woo's method and murray method are mentioned at two places (abstract and methodology) so clarify wheather they are same or different. If same use one term to avoid confusion. Prevalence of two species of trypanosomes are not calculated properly and use two digits after decimal place everywhere uniformly. Except these others are scientifically sound	
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	yes	
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	yes	
<b>Optional/General</b> comments	<b>Correct the spelling mistakes. Use complete scientific names in tree species found in the area. There are some mistakes in italicising the et al at certain places. References formatting as per a fixed standard should be done</b>
