Title of the Manuscript:	The Ogunlade Maturity Triangle and Theorem of Maturology: A Metaphorical Framework for Understanding Human Maturity
Type of the Article	Short communication

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript introduces a novel conceptual framework, the Ogunlade Maturity Triangle, and the Ogunlade Theorem of Maturology, which provide a metaphorical perspective on human maturity. By integrating internal cognitive and emotional capacities with external environmental influences, it offers a multidisciplinary model relevant to developmental psychology, neurology, sociology, and education. Such a framework has the potential to enhance our understanding of maturity as a dynamic and measurable construct, thereby contributing to the scientific discourse on human development.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is clear and well-structured, providing a concise summary of the study's key concepts and implications. However, it would benefit from briefly mentioning potential applications of the proposed model in research or practice to broaden its appeal.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically sound, and the theoretical framework is well-supported by relevant literature. However, empirical validation of the Ogunlade Maturity Triangle and Theorem of Maturology could strengthen the study's claims and applicability.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and include foundational works by Piaget, Vygotsky, and Bronfenbrenner. Adding recent studies on developmental frameworks or models integrating cognitive and environmental factors may enhance the discussion. Suggested references include: Advances in the ecological systems theory or biopsychosocial models. Recent publications on maturity and its measurement in psychology or sociology.
