Journal Name:	Asian Journal of Research in Biochemistry
Manuscript Number:	Ms_AJRB_129742
Title of the Manuscript:	Therapeutic Potentials of Phytochemicals in Combatting Antimicrobial Resistance (AMR)
Type of the Article	Review Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The subject is important, but the information that listed is weak, not specific and lack details and new insights.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The paper makes sweeping generalizations about phytochemicals (e.g., "alkaloids do this" and "flavonoids do that") without pinpointing specific compounds, their mechanisms, or supporting evidence. A high-quality review must delve into which compounds (e.g., berberine, curcumin, etc.) are responsible for the stated effects, supported by solid examples and data. Merely listing classes of phytochemicals without discussing their specific modes of action or providing evidence from studies (e.g., MIC values, in vitro vs. in vivo results) shows a lack of depth.	
Is the manuscript scientifically, correct? Please write here.	Need more work	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No	
Is the language/English quality of the article suitable for scholarly communications?	No	
<u>Optional/General</u> comments
