

Editor's Comment:

The goal of the study should be reported at end of the introduction Not in the material and methods, also without reporting the title of the paper

Please move the following phrase at the end of the introduction.....

To evaluate the impact of various organic and inorganic fertilizers on the yield performance of maize with nutrients content and their uptake.

In materials and methods the description of the statistical analysis is not reported (there is only the exp layout)

In the results the statistics is not reported in the figures and in the table

Figure 1

Zn concentration is wrong (check the unit)

Figure 3

Unit for EC and OC are missing

Please use a second y axis for EC and OC

Figure 4

Please do not put ,00 in the y axis
