PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The application of Artificial Neural Networks (ANNs) for detecting Diabetes Mellitus is significant as it leverages complex patterns in demographic, clinical, lifestyle, and dietary data to enhance early diagnosis. By integrating diverse risk factors, ANNs can provide a more holistic and accurate prediction model compared to traditional methods. Moreover, it supports personalized healthcare by adapting to individual variations, thereby improving management and prevention strategies for Diabetes Mellitus.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title of the article is suitable.	Thank you
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract of the article is very specific.	noted
