

Review Form 3

Journal Name:	Archives of Current Research International
Manuscript Number:	Ms_ACRI_130604
Title of the Manuscript:	Employing Ubiquitous Learning among Autistic Children
Type of the Article	Review Article

PART 1: Comments

	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Autism poses significant challenges, making its study crucial for the scientific community. Learning can be especially difficult for autistic children due to communication barriers, sensory sensitivities, and different cognitive processing styles. U-learning, which offers personalized and adaptive educational experiences, represents a promising breakthrough. By tailoring learning environments to the unique needs of autistic children, U-learning enhances engagement and promotes effective learning strategies, fostering more inclusive educational opportunities.	Noted
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	Thanks
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract of the article can include a variety of innovative methods that have been successfully implemented in U-learning.	OK
Is the manuscript scientifically, correct? Please write here.	yes	Thanks
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No	
Is the language/English quality of the article suitable for scholarly communications?	Grammar and spellings need to be rechecked	Corrected
<u>Optional/General</u> comments	The topic is compelling, and significant research has already been undertaken in this field. To strengthen the paper, the author should conduct a more thorough literature review that effectively showcases the current state of the art. Alongside FMRI signals, it's important to explore other techniques like EEG and eye tracking, which can also be valuable for identifying autism symptoms. By incorporating these methodologies, the author can enrich the discussion. Furthermore, a careful review of the language throughout the document is essential to enhance clarity and impact. Lastly, the references need to be properly cited to ensure academic rigor.	Noted
