Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is of great importance because it would help shed more light on the importance of <i>Persea americana</i> seed extract on doxorubicin induced coronary risk. With an increase in the levels of several unhealthy lipids in the body like the low density lipoprotein and triglycerides, there tend to be an increase in risk of toxicity to the heart causing dyslipidemiic conditions and atherosclerosis. But because of the ability of <i>Persea americana</i> in fighting off free radicals and reducing oxidative stress to the heart by clearing out unhealthy lipids, this research seeks to evaluate it's ability to reverse coronary risk caused by doxorubicin.	I appreciate the highlights of the importance of the study
