

Review Form 3

Journal Name:	Asian Journal of Case Reports in Medicine and Health
Manuscript Number:	Ms_AJCRMH_131294
Title of the Manuscript:	STEVENS-JOHNSON SYNDROME –TOXIC EPIDERMAL NECROLYSIS: induced by LAMOTRIGINE in a 15-year-old girl- case report.
Type of the Article	Case report

PART 1: Comments

	Reviewer’s comment Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	Author’s Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Authors want to report a new case about the incidence of SJS/TEN that induced by lamotrigine. This study is important to raise caution to the use of lamotrigine in neurology and psychiatric cases. The incidence can raise healthcare awareness to prescribe lamotrigine and to educate the side effect of lamotrigine.	I have taken the suggestions into consideration
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it’s suitable.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Please adjust the abstract based on the guidelines of the journal. The structure should have the following sections : aims, presentation of case, discussion and conclusion. There is no presentation of case and not divided into different sub-sections.	I have taken the suggestions into consideration
Is the manuscript scientifically, correct? Please write here.	Yes, the case report is scientifically correct.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes, there was 18 references (less the 20 references); however, previous studies for the references had a research range that was too long (oldest publication in 1922 and the newest publication in 2024). Please consider to change to the updated citation. References should follow the guideline style as mentioned in paper template. Example : Hilly, M., Adams, M. L., & Nelson, S. C. (2002). A study of digit fusion in the mouse embryo. Clinical and Experimental Allergy, 32(4), 489-498.	I have taken the suggestions into consideration
Is the language/English quality of the article suitable for scholarly communications?	Yes, it’s suitable.	
Optional/General comments	<ul style="list-style-type: none">Please add the abbreviations.The additional figure should be 5 figures only, please choose 5 of 7 figures attached in manuscript.Please add the aims of the study, the importance of the study, and the epidemiology of the study’s topicsPlease make the discussion into few paragraph that comprehensive to one another	I have taken the suggestions into consideration
