Type of the Article	Case report

PART 1: Comments

	<b>Reviewer’s comment</b> Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	<b>Author’s Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Dermatological adverse drug reactions are of great public health concern. There are varieties of drugs that may cause dose related and unrelated adverse effects. Most of these involve different types of rashes but some of them may be life-threatening like SJS and TEN. This paper covers a case report regarding SJS caused by an antiepileptic drug, which is of clinical significance for the scientific community.	I have taken the suggestions into consideration
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it is informative and suitable.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract is comprehensive, describing the case briefly.	
Is the manuscript scientifically, correct? Please write here.	The manuscript is scientifically sound and correct.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	There are adequate references added to the manuscript and most of them are recent ones.	
Is the language/English quality of the article suitable for scholarly communications?	I am not an expert in this area as it’s not my native language, but I did not identify any linguistic or grammatical errors except some spelling errors (please see the comments).	
Optional/General comments
