

Review Form 3

Journal Name:	Asian Journal of Food Research and Nutrition
Manuscript Number:	Ms_AJFRN_130541
Title of the Manuscript:	Maximizing the benefit of papaya fruits (Carica papaye) in production of some bakery products
Type of the Article	Original Research Article

Review Form 3

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The research is about replacing wheat flour in biscuits with the papaya. As celiac disease is a major concern nowadays, many researchers and bakeries are looking for alternatives. The use of papaya may help to replace the wheat in bakery	
Is the title of the article suitable? (If not please suggest an alternative title)	Some modification is required as it is only used in biscuit. Maximizing the benefit of papaya fruits (<i>Carica papaya</i>) in production of biscuits	This title was approved by several scientific committees, changing it would take a very long time, which would delay publication for several months.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract should be 250 words. Reduce the current abstract to below 250 words	The necessary work was done as much as possible to show the importance of the research.
Is the manuscript scientifically, correct? Please write here.	Give desktop mill manufacturer details Why corn flour was mixed with papaya, what is the interaction effect of papaya blended with wheat? Add product picture and papaya flour images.	The necessary work was done To produce gluten free biscuits We do not care here about the effect of papaya mixed with wheat flour because the resulting product will contain gluten and here we are producing a zero-gluten product. As for the pictures, after they were seen by the scientific committees, departments in the institute, and specialists, and were judged, and this is the greatest evidence of the hard work in the research, we did not care about taking pictures of the product.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Sufficient, bit latest references are missing. Some of them are very old. Try to cite last 15 years paper	I respect your opinion very much, but other reviewers have praised the research on this point.
Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments	In aw symbol w should be in subscript Give space between number and unit everywhere	The necessary work was done

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
