Optional/General comments	Sample size & target population is very less. Which author have clearly mentioned in the limitation. Want to suggest - analysis of referral forms, primary aids patient received & details of accomping health workers if you had added in the study would have been more informative for take home message for researchers & stakeholders.	Thank you for this. Yes, this would have added more information but a lot of these information are not available in the records because they present to the hospital's A&E either on self-referral or verbal referral by these TBAs.
