Is the title of the article suitable? (If not please suggest an alternative title)	Yes	Ok
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract does not give a clear understanding of the manuscript. So needs to be revised	I have revised .
Is the manuscript scientifically, correct? Please write here.	Kindly explain how were the treatment placed in RBD and split plot at the same time? None of the tables have SEM and CD values The experiment needs to be repeated for 1-2 years more to come to a strong conclusion	The treatments were placed in a randomized complete block design with a split-plot arrangement where crop arrangement system formed the main plots while the green gram variety assumed the subplots. The two field experiments were conducted in Mwala and Katangi during the 2022 short rains season in dryland areas of Kenya, thus they were two experiments conducted on two different sites simultaneously over one season. Thus, to reduce the strength of conclusion claim, the study requires further validation in future studies.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references should be revised as per journal format.	Ok
Is the language/English quality of the article suitable for scholarly communications?	Grammatical improvement is necessary.	Checked grammatical errors
