PART 1: Comments

	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	<p>The manuscript titled "Overview of Algorithms for Image Recognition" offers an in-depth review of the various algorithms employed in the field of image recognition, a critical area for advancements in computer vision and artificial intelligence.</p> <p>This work serves as a valuable reference for researchers by providing a summary of key techniques while comparing their applications, performance, and limitations.</p> <p>By covering both foundational concepts and recent innovations, the manuscript enhances the understanding of algorithmic approaches and encourages further innovation in the field. Such an overview is essential for steering future research and advancing the practical applications of image recognition technologies.</p>	Thanks Reviewer
<b>Is the title of the article suitable? (If not please suggest an alternative title)</b>	The title, "Overview of Algorithms for Image Recognition," is suitable as it clearly conveys the scope and focus of the manuscript.	Thanks Reviewer
<b>Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.</b>	<p>Yes, the abstract is comprehensive in relation to the title in the following ways:</p> <ol style="list-style-type: none"><li>1. The purpose of the study is clearly defined, and the research gap is significantly identified.</li><li>2. The author includes key algorithms and provides a brief description of them in the abstract.</li><li>3. The findings from the research are also mentioned in the abstract.</li></ol>	The text effectively summarizes the paper's focus on image recognition technologies, highlighting both theoretical advancements and practical implications. With minor improvements in explanation and organization, it could serve as an excellent introduction to the topic for a broad audience
<b>Is the manuscript scientifically, correct? Please write here.</b>	The manuscript is scientifically accurate. This article clearly summarized the algorithms for image recognition and presents the findings related to this field. Additionally, the concept is thoroughly discussed in the research.	Thanks Reviewer
<b>Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.</b>	The references provided for this article are sufficient, and all of them are from the past four years.	References are sufficient.
<b>Is the language/English quality of the article suitable for scholarly communications?</b>	The author has used English with correct grammar and clarity throughout the article.	Thanks reviewer
<b><u>Optional/General</u> comments</b>	<p>The author(s) are advised to consider the following aspects:</p> <ol style="list-style-type: none"><li>1. Improve the quality of the images.</li><li>2. Ensure proper justification of content in all paragraphs where necessary.</li><li>3. Use referencing tools to organize all references, including DOI numbers.</li><li>4. Include a section on image preprocessing with basic algorithms to enhance the technical depth of the article.</li><li>5. Add a conclusion or provide a clearer summary.</li></ol>	<p>. Use high-resolution versions and optimize formats for uniformity and clarity to improve image quality.</p> <p>. Make sure each paragraph is properly justified to keep the layout polished and eye-catching.</p> <p>. To keep the layout neat and appealing, make sure each paragraph is well justified.</p> <p>To successfully summarize the main ideas and reaffirm the article's contributions, include a conclusion. These actions will enhance the article's overall quality, depth, and clarity.</p>
