

Review Form 3

Journal Name:	Asian Journal of Research in Dermatological Science
Manuscript Number:	Ms_AJRDES_129856
Title of the Manuscript:	Christ-Siemens-Touraine syndrome: case report
Type of the Article	Case report

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript holds significant importance for the scientific community as it provides a comprehensive case report on Christ-Siemens-Touraine syndrome, a rare form of ectodermal dysplasia. By detailing the clinical, genetic, and diagnostic features of the disorder, it enhances the understanding of its manifestations and the challenges faced by affected individuals. Furthermore, the discussion on genetic confirmation through the Ectodysplasin A (EDA) gene underscores the critical role of molecular diagnostics in rare genetic disorders. The insights shared in this study contribute to a better framework for clinical management and pave the way for future research into targeted therapies and potential genetic interventions.	Thank you
Is the title of the article suitable? (If not please suggest an alternative title)	The current title, "Christ-Siemens-Touraine syndrome: case report," is concise and describes the focus of the manuscript. However, it could be made more engaging and informative by including details about the case and its significance.	I've modified the title saying that the condition is rare
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract provides a good overview of the case report, including the background, case details, diagnosis, and clinical significance.	Thank you
Is the manuscript scientifically, correct? Please write here.	The manuscript appears to be scientifically accurate based on the information provided, presenting a well-documented case report on Christ-Siemens-Touraine syndrome (CST). It includes key aspects of clinical presentation, diagnostic workup, and management strategies, which align with established knowledge about CST and ectodermal dysplasias.	Thank you
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references in the manuscript are not uniform and should follow a consistent citation style, such as APA or Vancouver(Asp per journal scope). Additionally, some references are outdated; it is recommended to include more recent studies from the last five years to enhance the manuscript's relevance and credibility.	I've modified the reference style
Is the language/English quality of the article suitable for scholarly communications?	The language quality of the article is generally suitable for scholarly communication, but there are areas where clarity and grammar could be improved for better readability and precision. A thorough review and editing for language refinement are recommended.	Ok
Optional/General comments	Presentation must be improve .
