Title of the Manuscript:	A Study of Gonadal Hormones in HIV Seropositive Subjects Attending the ART Center at K.R. Hospital, a Tertiary Care Hospital in Mysuru
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	<div>1. Manuscript is good, absolutely fine for scientific community but only little revision require from my point of view.</div> <div>2. Kindly ensure that the patient's details were strictly confidential.</div> <div>3. The researcher's area of research done is up to date in stipulated time but it further need to increase the experimental size so that the results were getting more highly significant.</div>	<div>1. We appreciate the reviewer's acknowledgment of the manuscript's relevance. In response to this comment, we have revised the introduction section to further elaborate on the importance of our study for the scientific community, emphasizing its potential to advance current knowledge and improve patient outcomes.</div> <div>2. To ensure patient confidentiality, we confirm that all patient data has been anonymized and handled in compliance with ethical guidelines. A statement highlighting this has been added to the Methods section.</div> <div>3. Regarding the experimental size, we acknowledge this valuable suggestion. We have added a section in the Discussion addressing this limitation and outlined a plan for future studies with a larger sample size to enhance the significance of the findings.</div>
Is the title of the article suitable? (If not please suggest an alternative title)	Title need little update, “ ART write the full i.e. Anti –retroviral Therapy and instead of subjects use the term patients.	The title has been updated as suggested. We replaced "ART" with its full form, "Anti-retroviral Therapy," and substituted "subjects" with "patients" for clarity and inclusivity
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract is precise, concrete and accurate up to some extent and no further addition needed.	We are pleased that the abstract was found precise and accurate. No changes were made, as no further additions were required.
Is the manuscript scientifically, correct? Please write here.	Manuscript is scientifically correct.	Thank you for affirming the scientific accuracy of the manuscript. No further modifications were necessary.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References need some addition to support your work.	As per the reviewer's recommendation, we have added recent and relevant references to strengthen the manuscript. These references have been highlighted in the updated manuscript.

Review Form 3
