

Review Form 3

Journal Name:	Asian Research Journal of Arts & Social Sciences
Manuscript Number:	Ms_ARJASS_131289
Title of the Manuscript:	Navigating Dual Roles: A Study on the Competence and Academic Performance of Student Parents in Higher Education Institution
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer’s comment Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	There is quite a great potential in the research topic. The manuscript is scientific enough but requires little modification in its content. The conceptualization of its objectives is without any form of ambiguity at all. The area of concentration is of paramount importance to family mentorship and global development.	Yes thanks
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, but with minor adjustment. I will rightly suggest an alternative to read thus “ An Analytical Study of the Competence and Academic Performance of Student Parents in Higher Education Institutions: Dual Roles Navigation ”	Thank you for the suggestion. I appreciate the input, but I would like to retain my original title: I believe it best captures the focus and scope of my research."
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is very good as presented. There are acronyms used that must be defined. The example of ANOVA (Analysis of Variance).	Noted.
Is the manuscript scientifically, correct? Please write here.	Yes. There is need for multiple datasets from diverse institutions in Philippines to enhance the reasonableness, robustness and generalizability of the research. There is need for provision of more detailed tables from the institutions. There is need for clarity and mathematical computations in the evaluation of Frequency, percentages, mean, standard deviation, T-test, one-way ANOVA, Duncan test for post hoc comparison, Pearson correlation and Multiple Regression Analysis in this work. This will inevitably enhance the potential of this study. There is need for the provision of a sample survey questionnaire used for this research. In addition, there is need for inclusion of challenges and limitations of the research methodologies to enhance the effectiveness of the presentation. The author mentioned “ Prediction on Student Parents' Competence in Pursuing Higher Education to their Academic Performance ” under RESULTS AND DISCUSION subtopic which equally lacked depth. There is need for the restructuring of the manuscript..... I. Introduction II. Literature Reviews III. Methodology IV. Results V. Discussion The “Introduction” has to caption the sections of the study. The conclusion has to be modified due to multiple datasets from diverse institutions.	Thank you for the detailed feedback and constructive suggestions. I appreciate your insights and recognize the potential for further enhancement of this research. Below are my responses to your recommendations:" Multiple datasets from diverse institutions: "I acknowledge the importance of incorporating data from multiple institutions in the Philippines to enhance the robustness and generalizability of the study. However, this current research focuses on a targeted dataset. Expanding to multiple datasets can be explored in future research." Detailed tables from the institutions: "Thank you for the suggestion. I will consider including additional detailed tables where possible to improve data transparency." Mathematical computations and clarity in statistical analysis: "The computations for frequency, percentages, mean, standard deviation, T-test, one-way ANOVA, Duncan test, Pearson correlation, and multiple regression have been conducted thoroughly. I will review the presentation of these results to ensure clarity and comprehensibility." Sample survey questionnaire: "I will explore the possibility of providing the sample survey questionnaire, subject to ethical considerations and institutional data-sharing policies." Challenges and limitations of research methodologies:

Review Form 3

		<p>"Acknowledging challenges and limitations is crucial. I will expand this section to provide a more comprehensive discussion."</p> <p>Depth in "Prediction on Student Parents' Competence in Pursuing Higher Education": "I appreciate this observation and will work on enhancing the depth of this section to provide a more comprehensive analysis."</p> <p>Restructuring of the manuscript: "While I respect the suggestion for manuscript restructuring, I believe the current format effectively communicates the key components of the study. However, I am open to minor adjustments if necessary."</p> <p>Captions in the "Introduction": "I will review the Introduction to ensure it effectively previews the study's key sections."</p> <p>Modification of the conclusion: "Since the study focuses on a specific dataset, a general conclusion is appropriate. However, I will review it to ensure it aligns with the current research scope."</p>
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are recent. However, there is need for addition of more recent references because only nine (9) would not produce a robust a research journal article.	Noted.
Is the language/English quality of the article suitable for scholarly communications?	The quality of English language is absolutely appropriate.	Thank you.
Optional/General comments	Please, let the author look into the comments aforementioned and respond.	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
