

Review Form 3

Journal Name:	Asian Research Journal of Gynaecology and Obstetrics
Manuscript Number:	Ms_ARJGO_131445
Title of the Manuscript:	Prevalence and outcomes of Myomectomy in a tertiary hospital in Southern Nigeria: A five-year review.
Type of the Article	Original Research Article

PART 1: Comments

	<b>Reviewer's comment</b> Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	<b>Author's Feedback</b> <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	It's important to show the updated treatment for major problems that affect fertility in women. Also, this article presented the minimally invasive treatment technology for uterine fibroids in women. It explained a retrospective descriptive study review from large numbers of affected uterine fibroids cases which is important to follower researchers.	
Is the title of the article suitable? (If not please suggest an alternative title)	It's suitable	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	It's comprehensive but I don't prefer the division into background, methods ....ect. I prefer abstract all-in-one comprehension without classes.	
Is the manuscript scientifically, correct? Please write here.	Yes its scientifically	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	It's recent but not sufficient	
Is the language/English quality of the article suitable for scholarly communications?	No, I found a lot of Grammar defects in the words	Thank you. I've gone through the work again to correct the grammar defects
Optional/General comments	The introduction is very long, it must contain short, simple, and effective sentences. Methods didn't have even one image of treatment tools used for cases.	The participants had only 2 options: myomectomy and hysterectomy.

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
