

Review Form 3

Journal Name:	European Journal of Medicinal Plants
Manuscript Number:	Ms_EJMP_130181
Title of the Manuscript:	A Review of the Botanical, Ethnomedicinal Uses, and Phytochemistry of Dalbergia (Fabaceae) Species
Type of the Article	Mini review

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript highlights the ethnomedical applications and phytochemical components of the Dalbergia genus, which is a member of the Fabaceae family, and offers insightful information about its potential for medicinal usage. The study adds to the expanding body of information on plant-based medicines by examining Dalbergia species' biology, botanical features, and medicinal qualities, thereby opening up new research and drug development directions.	Noted
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title accurately conveys the main ideas of the work, which include the phytochemical composition, therapeutic applications, and botanical features of Dalbergia species.	Noted
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Although the abstract is thorough overall, it would be advantageous to emphasize the particular health advantages or illnesses that Dalbergia species address. Addressing the potential effects of these findings for the next pharmacological studies or medication development would also increase the impact of the abstract.	Noted
Is the manuscript scientifically, correct? Please write here.	Yes	Noted
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	I suggest incorporating more recent studies from 2020 onwards, especially those related to the pharmacological activities and modern applications of Dalbergia species.	Noted
Is the language/English quality of the article suitable for scholarly communications?	yes	Noted
Optional/General comments	The manuscript provides an insightful review of the botanical, ethnomedicinal, and phytochemical properties of Dalbergia species, highlighting their significant potential in traditional and modern medicine.	Noted
