| Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part. | In promoting health, it is important to consider consumers' and fast-food providers' nutritional knowledge and attitudes. It is common practice to resort to spices containing monosodium glutamate (MSG) to enhance food taste, which has been linked to the increasing prevalence of Nutrition-related NCDs like hypertension and diabetes. The knowledge and cooking practices of fast-food providers relating to nutrition and health are important as consumers increasingly become mindful of healthy eating and nutrition. If fast food vendors do not provide adequate vegetables to consumers, then consumers are at risk of NCDs and other immunocompromised diseases. | Noted |
