PART 1: Comments

	Reviewer's comment Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is important for the scientific community as it addresses the growing concern of Type 2 diabetes and hypertension among secondary school children, a population that is increasingly at risk due to lifestyle changes. By focusing on primary prevention and management strategies in Morogoro Municipality, the study provides valuable insights into early intervention approaches that can help reduce the long-term burden of these chronic diseases. The findings contribute to public health policies, guiding schools and healthcare providers in implementing targeted awareness programs, lifestyle modifications, and preventive healthcare measures. Furthermore, this research supports global efforts to combat non-communicable diseases by emphasizing the importance of early health education and intervention in adolescent populations.	Thanks for the comments
