

Review Form 3

Journal Name:	International Journal of Biochemistry Research & Review
Manuscript Number:	Ms_IJBCRR_130710
Title of the Manuscript:	Prevalence of Post-Stroke Cognitive Impairment and Dementia in a Sudanese Cohort: A Single-Center Retrospective Study
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This study on the prevalence of post-stroke cognitive impairment (PSCI) and dementia among Sudanese stroke survivors, along with the identification of associated risk factors, offers valuable insights for researchers and faculty members.	Thanks for the comments
Is the title of the article suitable? (If not please suggest an alternative title)	Yes suitable for publish	Thanks
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Its ok	Thanks for the comments
Is the manuscript scientifically, correct? Please write here.	yes	Thanks for the comments
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	yes	Ok
Is the language/English quality of the article suitable for scholarly communications?	yes	
Optional/General comments	Please edit the limitation of the study after conclusion and the subsequent sections of the text following the tables and figures need to be articulated in a sequential manner.	<b>Thank you for the valuable comments</b> <b>We have addressed each point, and below are the limitations;</b>  <b>Limitations</b> Data were obtained from a single hospital, which may limit broader applicability of findings across different regions or clinical settings. Although the target enrollment was reduced by local circumstances, the final group of 81 participants still provides insights but may not allow extensive subgroup analysis. Utilizing some hospital records could have introduced potential inaccuracies or incomplete documentation of pre-stroke conditions.

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
