

Review Form 3

Journal Name:	International Journal of Environment and Climate Change
Manuscript Number:	Ms_IJECC_130560
Title of the Manuscript:	Survey of major insect pests, natural enemies and diseases of brinjal in tribal belt of Surat district
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The present study is of significant importance for the scientific community and integrated management of pests and diseases regarding the eggplant crop.	Thanks
Is the title of the article suitable? (If not please suggest an alternative title)	Monitoring of major insect pests, natural enemies and diseases of brinjal in tribal belt of Surat district - India	Title of the article is revised as “Survey of major insect pests, natural enemies and diseases of brinjal in tribal belt of Surat district, Gujarat, India”
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Reduce the information provided in the summary, complementing the specific information that aroused the reader's curiosity when reading the summary. Also make it clear that leafhoppers are insect vectors and, therefore, their incidence is correlated with the emergence of diseases such as phytoviruses.	The information of insect vector is included in the manuscript. “The little leaf disease of brinjal showed highly significant positive correlation with its vector i.e. leafhopper population.”
Is the manuscript scientifically, correct? Please write here.	Yes, the work makes a positive contribution. However, the authors must correct the spelling of scientific names, as well as clearly report the methods of identification of insect and fungi species and climate data (weather station or free virtual database).	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references presented are current and consistent with the data presented in the paper. Authors must provide references to climate data.	Add two references of climate data and correlation in the manuscript. Many other references are already there in the manuscript.
Is the language/English quality of the article suitable for scholarly communications?	Yes.	Yes
Optional/General comments	<ul style="list-style-type: none">-Insert the name of the genus Lepdoptera without abbreviations in its first citations in the text, only after being able to abbreviate.-characteristics of phytoviruses and phytoplasmatic diseases are similar, include information. cite diagnostic methods-Name species from Order, Family and Genus (at least) use common name only after scientific name- Is it important to describe the methods of identifying Fusarium infections? (isolation or phylogenetic identification)- In the conclusion, you should summarize the information already contained in the results, replacing it with a simple and clear conclusion regarding the main objective of the work.	<ul style="list-style-type: none">- The order name Lepidoptera is described in the manuscript.- Characteristics symptoms of phytoplasmal little leaf disease are cited in the introduction of the manuscript.- The scientific name of insect species with order and family are included in the manuscript. In major references/research papers scientific name are described after common name of pests.- An insect species and diseases of brinjal were indentified in the laboratory at Navsari Agricultural University during initial years of study.- In the conclusion, The information is replaced with simple and clear view of results.
