

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_129950
Title of the Manuscript:	Long-term organic and inorganic fertilization affect soil pH, humus carbon fractions, and crop yield in three soils
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	It is a very informative manuscript. Information presented in a very standard way. Tools are very systematic.	Thank you for your positive feedback. We are pleased that the manuscript has been found informative and well-structured. The systematic approach and tools used were carefully selected to ensure the reliability and clarity of the presented data.
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, but the term ‘three soils’ must be correct.	We did the revision and replaced "three soils" with "three soil types" in the manuscript title to reflect the classification of the soils based on their distinct characteristics.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	The abstract, as a key part of the manuscript, was carefully crafted to convey the main findings of our research. We appreciate your confirmation of its scientific quality.
Is the manuscript scientifically, correct? Please write here.	Yes	Thank you for your feedback. We hope our work provides sufficient information to the broader scientific community.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	The references were carefully selected to align with the context of our study. Thank you for this response.
Is the language/English quality of the article suitable for scholarly communications?	Yes	We appreciate your confirmation that the language quality is suitable for scholarly communication.
Optional/General comments	Good, but some minor correction needed at title.	In reference to your suggestion, we have revised the title and replaced "three soils" with "three soil types" to more accurately reflect the specific soils studied in our research.

PART 2:

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Our manuscript followed ethical guidelines. We believe this work provides important insights to the scientific community and contributes to the ongoing discussions on soil management and agriculture sustainability.
