

Review Form 3

Journal Name:	International Journal of Plant & Soil Science
Manuscript Number:	Ms_IJPSS_129950
Title of the Manuscript:	Long-term organic and inorganic fertilization affect soil pH, humus carbon fractions, and crop yield in three soils
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Indiscriminate use of chemical fertilizer adversely affects the organic carbon content of the soil and others physicochemical properties of soil, which ultimately reduces soil fertility and crop productivity. Organic manures are the primary sources of organic matter addition to the soil, which is the vital source of nutrient. Use of organic manure and chemical fertilizer results in improvement in soil structure and crop yield.	Thank you for this broader understanding of our study and the benefits it brings to improving soil management strategies for sustainable agricultural productivity.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	The abstract, being a fundamental component of the manuscript, was thoroughly written to report the main findings of our research. We appreciate your confirmation of its scientific quality.
Is the manuscript scientifically, correct? Please write here.	Yes	Thank you for your acknowledgement of the scientific correctness of our work. We are looking forward to the great impact this will have on the scientific community.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	We conducted a comprehensive review of previous studies and selected the most appropriate references that best suit our work. Thank you for the confirmation.
Is the language/English quality of the article suitable for scholarly communications?	Yes	Grammar and composition are key aspects of communication, especially in the academic and scientific community. We have done our best to ensure that the findings of this study are presented in a clear and concise manner that the journal's readership will appreciate.
Optional/General comments		

Review Form 3

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>	Our manuscript adheres to ethical guidelines. We believe it offers valuable insights to the scientific community and discussions on soil management and sustainable agriculture.
