

Review Form 3

Journal Name:	International Neuropsychiatric Disease Journal
Manuscript Number:	Ms_INDJ_130698
Title of the Manuscript:	Psychocardiology in Oncology: Holistic Approaches to Mitigate Mental and Cardiac Health Risks in Cancer Patients
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript is highly significant for the scientific community as it bridges the gap between psychological health, cardiovascular health, and oncology care. The emerging field of psychocardiology provides a multidimensional approach to improving cancer treatment outcomes, emphasizing the importance of holistic care that integrates mental and cardiac health management. It offers valuable insights into mitigating the adverse effects of cancer therapies, promoting survivorship care, and improving the quality of life for patients.	edited
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, the title is suitable as it effectively conveys the manuscript's focus on psychocardiology in oncology and the holistic approach to mental and cardiac health risk.But follwing is my suggested title "Integrating Psychocardiology into Oncology: A Holistic Approach to Address Mental and Cardiac Risks in Cancer Care."	edited
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive and summarizes the manuscript well. However, it could benefit from including specific examples of interventions (e.g., mindfulness-based stress reduction, CBT) and emphasizing the role of cardio-oncology programs in managing risks. This will provide a clearer picture of the manuscript's practical applications.	Noted
Is the manuscript scientifically, correct? Please write here.	Yes, the manuscript is scientifically robust. It provides well-referenced data on the interplay between cancer, mental health, and cardiovascular health. The explanations of mechanisms such as inflammation, HPA axis dysregulation, and the impact of cancer therapies are thorough and evidence-based.	Thanks for the comments
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are extensive and cover a broad range of relevant studies. However, it might be helpful to include more recent references, particularly from the last two years, on technological advancements in psychocardiology or specific cardio-oncology program outcomes.	Ok
Is the language/English quality of the article suitable for scholarly communications?	The language is suitable for scholarly communication but could benefit from minor grammatical refinements. For instance, simplifying long sentences and addressing occasional redundancies will enhance readability.	Noted and revised
Optional/General comments	<p>The manuscript offers an innovative perspective on a multidisciplinary framework but could enhance its practical impact by including case studies or examples of integrated psychocardiology practices. Additionally, more emphasis on patient-reported outcomes and caregiver roles would strengthen the holistic approach.</p> <p>The manuscript requires minor revisions for enhanced clarity and the inclusion of more recent studies, particularly on technology and patient-centered outcomes.</p>	Thanks for the valuable comments.
