Is the title of the article suitable? (If not please suggest an alternative title)	No (Comparison of parasite prevalence in marine fish <i>Sardinella maderensis</i> (Teleostei: Clupeidae) according to different length and fish sex in the waters near the coast of Benin (West Africa).)	Authors have approved the suggested title.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes	
Is the manuscript scientifically, correct? Please write here.	In the identification of parasites, it is necessary to use genetic sequencing methods. Otherwise, it is necessary to draw the parasites and provide their measurements. Unfortunately, in this article, there is no document about the correct identification of parasites.	Authors are well aware of this. And parasites samples were kept for this purpose. Unfortunately, technical conditions had not helped to achieve this objective. This is an opportunity to get if possible the contact of the valuable reviewers if they can help us in this concern
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Some of the references which used are not listed in the reference section. Some of the references have no date or the date is wrong.	All references have been updated.
Is the language/English quality of the article suitable for scholarly communications?	It needs to be modified and improved	Authors have incorporated all suggested corrections
Optional/General comments		Thanks for the valuable comments
