

Review Form 3

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_130647
Title of the Manuscript:	A Comparative Study on Exercise Difficulty of "Triangle" in Chinese and Vietnamese Junior High School Mathematics Textbooks
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript provides valuable insights into the differences in exercise difficulty in mathematics textbooks from China and Vietnam. The study helps in understanding how the two curricula emphasize mathematical skills such as computation and reasoning, offering a useful reference for textbook development and instructional practices.	Thank you for your insightful comments. We have revised the manuscript accordingly and highlighted the corrected parts. Here is our concise feedback on the importance of this manuscript: This manuscript provides a comparative analysis of the exercises in middle school mathematics textbooks of two different educational systems in China and Vietnam, which is of great significance to the scientific community. Through the application of comprehensive difficulty model, this study not only evaluates the complexity of exercises, but also puts forward practical teaching suggestions for strengthening students' logical reasoning, calculation ability and knowledge integration ability. The results of this study have important reference value for curriculum developers and educators, and help to optimize textbook exercise design, so as to enhance students' learning engagement and effectiveness.
Is the title of the article suitable? (If not please suggest an alternative title)	The title is clear but could be slightly refined for conciseness: Suggested Alternative: "Comparative Analysis of Exercise Difficulty in 'Triangle' Sections of Chinese and Vietnamese Junior High School Mathematics Textbooks."	Thank you very much for your valuable comments! I appreciate your insights and have changed the title as suggested. The new title is indeed more succinct and clear.

Review Form 3

Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	<p>The abstract is comprehensive but requires minor improvements:</p> <ul style="list-style-type: none">Reduce redundancy in phrases such as "conduct a comparative analysis..."Clarify the implications of the findings for educators and textbook authors.	<p>Thank you for your valuable comments on the abstract. In response to your first comment, we have reviewed the language of the abstract and the full paper and reduced redundancy in phrases such as "conducted a comparative analysis...". In response to your second comment, we have added a concise statement of the significance of the study at the beginning of the abstract, reflecting the implications of the findings for educators and textbook writers. This revision has made the abstract more complete. Once again, thank you for your comments.</p>
Is the manuscript scientifically, correct? Please write here.	<p><input type="checkbox"/> The research methodology is valid, but the selection criteria for the textbooks should be further justified (e.g., why were the Zhejiang and Kite Editions chosen?).</p>	<p>Thank you very much for your positive evaluation of our manuscript. We are pleased that you have recognized the scientific validity and of the methodologies employed in our study. As for the selection criteria of textbooks, we have made a supplement in the third paragraph of the introduction. Specifically, we have incorporated the following sentence into our manuscript: "Considering the wide range of application and similarity of textbook concepts, we select the most recently published textbooks in China and Vietnam named the Zhejiang Edition and the Kite Edition for comparison." After we added it, it really became clearer. Thank you for your valuable comments.</p>
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	<p><input type="checkbox"/> The references are sufficient and relevant but could be strengthened with more recent literature on comparative mathematics curricula.</p>	<p>Thank you for your insightful comments on the references. In order to more strongly support and strengthen the manuscript, we have added several more recent literatures on comparative mathematics courses. Thank you again for your valuable input.</p>
Is the language/English quality of the article suitable for scholarly communications?	<p><input type="checkbox"/> The academic language is generally appropriate, but some sentences are overly complex, and there are minor grammatical inconsistencies.</p> <p><input type="checkbox"/> Certain phrases could be made more concise to enhance readability.</p>	<p>Thank you for your suggestions. We have revised some grammar and simplified some long sentences to make the article more understandable.</p>
Optional/General comments	<p>Minor revisions are required to improve language clarity, methodological justification, and discussion of the study's implications. This manuscript holds strong scientific value and is suitable for publication following revision.</p>	<p>Thank you very much for your affirmation and suggestions regarding our article. We have simplified some sentences and added some new research significance in the conclusion section. I believe this will make our article even more comprehensive.</p>

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
