

Review Form 3

Journal Name:	Journal of Advances in Mathematics and Computer Science
Manuscript Number:	Ms_JAMCS_131124
Title of the Manuscript:	Locally attractivity results for fractional order quadratic functional integral equations
Type of the Article	

PART 1: Comments

	Reviewer’s comment Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	Author’s Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The identification of dynamical systems by integer-order differential equations has been very successful, due to their ability to describe the actual behavior of the system. However, in recent decades, many mathematicians have argued that the use of fractional-order differential equations better describes the actual behavior of a system. In many fields, modeling with a non-integer derivative further improves model accuracy. Thus, the use of a highly accurate model enables reliable analysis of its fundamental properties (controllability, observability and stability) and improves its performance.	Okay
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	I believe that this summary is not sufficient to prove the idea of this article because there are several repetitions of the same sentence with the same meaning.	Noted
Is the manuscript scientifically, correct? Please write here.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	No	
Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	Unfortunately, some of the mathematical symbols used in this article are wrong.	Done as suggested

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
