

Review Form 3

Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_130356
Title of the Manuscript:	Efficacy of Tooth Bleaching with 35% and 6% Hydrogen Peroxide in Primary Dentition: Study Protocol for a Randomized Controlled Clinical Trial
Type of the Article	Study Protocol

PART 1: Comments

	Reviewer’s comment	Author’s Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.		
Is the title of the article suitable? (If not please suggest an alternative title)		
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.		
Is the manuscript scientifically, correct? Please write here.		
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.		

Review Form 3

Is the language/English quality of the article suitable for scholarly communications?		
<u>Optional/General</u> comments	<ul style="list-style-type: none">• Instead of writing just the proposed protocol a pilot study should have been included• The authors should highlight the need for the study• The hypothesis and alternative hypothesis should be included <p>The author cannot presuppose or preempt the outcome</p>	<p>I would like to sincerely thank you for agreeing to review our article. Your time and expertise are greatly appreciated, and your feedback is invaluable to improving the quality of our work.</p> <ul style="list-style-type: none">• The clinical study has not yet started; therefore, it is not possible to include a pilot study at this time. We appreciate the suggestion and plan to publish a pilot study as soon as we have initial results.• We would like to emphasize the need for this study based on the following points:<ul style="list-style-type: none">○ Tooth bleaching is an aesthetic treatment that preserves the tooth structure.○ Tooth discoloration can impact children's quality of life, especially during psychosocial development.○ Tooth bleaching, besides aesthetic improvements, can restore self-esteem in children.○ There is limited literature on bleaching protocols for primary teeth.○ This study aims to provide evidence to assist professionals in decision-making regarding darkened primary teeth with aesthetic complaints.• The hypotheses for this study are as follows:<ul style="list-style-type: none">○ Lower levels of tooth sensitivity will be observed in the group using the low-concentration hydrogen peroxide whitening product, due to its alkaline and stable pH.○ There will be no significant difference in the final whitening results between the two groups.• Thank you for this guidance. We have revised the discussion accordingly.

PART 2:

	Reviewer’s comment	Author’s comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
