Journal Name:	Journal of Advances in Medicine and Medical Research
Manuscript Number:	Ms_JAMMR_130764
Title of the Manuscript:	Photobiomodulation effects on the postoperative outcomes of surgically assisted rapid maxillary expansion: a double-blind randomized controlled pilot study
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	<ul style="list-style-type: none">This manuscript contributes meaningfully to the scientific community by explaining the therapeutic potential of photobiomodulation in mitigating the postoperative sequelae following SARMEExploring the effects of photobiomodulation, this manuscript addresses the critical need for optimizing the patient care and treatment following the surgery.	We appreciate the reviewer's comments and their dedication to this review.
Is the title of the article suitable? (If not please suggest an alternative title)	Please consider revising the title to better reflect the study's main findings and contributions to "Photo biomodulation effects on the post-operative sequelae following Surgically Assisted Rapid Maxillary Expansion: A double-blinded randomized controlled pilot study."	We appreciate the suggestion; the title has been modified.
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract provides a good overview of the study, but could be strengthened more by stating the clinical implications and significance. Could be better to balance specificity of the keywords that there is an enhanced visibility and discoverability of your manuscript.	We appreciate the suggestions. The modifications are highlighted in yellow.
Is the manuscript scientifically, correct? Please write here.	Yes	Thank you.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	Thank you.
Is the language/English quality of the article suitable for scholarly communications?	To an extent	Thank you.
Optional/General comments	Would like to suggest that discussion part could be a bit modified with results being compared with those of previous studies in a better way.	We have rewritten parts of the discussion to address your important suggestion. Unfortunately, we were unable to locate randomized controlled trials that used PBM in the postoperative setting of SARME for comparison purposes. The changes are highlighted in yellow.
