Review Form 3

Is the language/English quality of the article suitable for scholarly communications?		
Optional/General comments	<p><b>General Comments:</b></p> <ol style="list-style-type: none"><li>1. There are some spelling and grammatical mistakes.</li><li>2. Use third person language.</li><li>3. No sentence should start with abbreviation or figure.</li><li>4. Booth past and present tense are used, as it is retrospective study better to use past tense.</li></ol> <p><b>Abstract &amp; Introduction:</b> Rationale of study not given.</p> <p><b>Results:</b></p> <p><b>Discussion:</b> References are not given properly. This can be explained by the disproportionate prevalence of breast cancer in Nigeria. However, this is contrary to a report from Pakistan that reported preponderance of males (Jamal et al)<sup>9</sup>. This statement regarding breast carcinoma, is absolutely wrong in the article, given with ref – 9 as in that study (ref-9) female preponderance of carcinoma breast was for ahead to male as in whole world.</p> <p><b>Tables, Figures:</b> Too large and caption of figure and table should be stand alone.</p> <p><b>Overall Opinion:</b> It should be published as short communication or as letter to editor not as original article.</p>	Thanks for the comments Noted and revised as per suggestions

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
