<p>Is the language/English quality of the article suitable for scholarly communications?</p>		
<p>Optional/General comments</p>	<p>Overall description:</p> <p>The manuscript presents relevant findings on the impact of fenugreek seed powder on broiler performance under stress and could be accepted after addressing issues with methodological clarity and deeper discussion on the statistical significance of results. Additionally, refining the language and enhancing the coherence of the introduction and results sections is recommended.</p> <p>Comment to the Author:</p> <ol style="list-style-type: none"> 1. Eliminate redundant details, particularly in the abstract, introduction, and methodology sections. 2. Provide a more rigorous analysis of the statistical findings, addressing any apparent inconsistencies. 3. weekly feed intake differences are reported as statistically significant, the overall feed intake was deemed insignificant. This discrepancy needs clarification or more nuanced discussion. 4. The discussion does not adequately compare findings to existing literature to highlight how this study corroborates or challenges previous research. 5. The conclusion suggests broad applications of fenugreek supplementation without addressing its limitations, such as cost implications or potential side effects on broilers. 6. Many citations are over a decade old. Incorporating more recent studies would strengthen the manuscript. 	<p>Few sentences of the abstract, introduction, and methodology sections are omitted and deleted.</p> <p>Corrected the details of statistical analysis Included some recent citations</p>
