	Reviewer’s comment	Author’s Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study is about to investigate the income sufficiency of rural households of any district as here Malda district of West Bengal is mentioned in it. Basically, the term Sufficient income refers to having enough money to meet the basic needs and participate in the society. It can also refer to having enough income to achieve a certain standard of living and also can cover food, housing, healthcare, education, and other essential needs. The area of study belongs to Macroeconomics field of economics, social sciences and it is very essential topic regarding income or revenue that how much it should be sufficient for the person to have power of purchasing or affording something.	The sufficiency of income is critically addressed in terms of various expenditure done by the households of different categories using appropriate formulae. Household income and consumption expenditure are two direct financial indicators used to evaluate the economic well-being of a population. Analysing rural household income from various sources and tracking consumption expenditure on different items is essential but assessing whether income is sufficient to cover expenses is a more accurate indicator of the financial stability of households in a given region. It is crucial for policy formulation, as it provides basic information that is essential to determine the requirements for planning rural livelihood diversification programmes.
