

Review Form 3

Journal Name:	Microbiology Research Journal International
Manuscript Number:	Ms_MRJI_129180
Title of the Manuscript:	Fresh vegetables as a source of multidrug resistant pathogens
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimumof 3-4 sentences may be required for this part.	This manuscript addresses a critical public health concern by examining the prevalence of microbial contamination and antimicrobial resistance in fresh vegetables from the Gaza Strip. It highlights the risks posed by multidrug-resistant bacteria, contributing valuable data to global efforts aimed at mitigating foodborne illnesses and antimicrobial resistance. The study's findings emphasize the urgent need for improved food safety practices, offering actionable insights for agricultural and health policy stakeholders. Its relevance extends beyond the local context, aligning with international efforts to enhance food security and public health.	Significant importance in the filed of public health and environmental science. Its highlight the role of fresh vegetables in harbouring and promoting the spread of antibiotics resistance bacteria. With the increasing of antibiotics use in agriculture, resistance bacterial strains may thrive on these vegetables. Posing a threat public health, especially when consumed without proper washing or treatment. The research emphasize the need for implementing healthy agriculture practice and food quality monitoring.
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is comprehensive and effectively summarizes the study. However, I suggest explicitly mentioning the public health implications of the findings and the geographical focus (Gaza Strip) to enhance clarity. Additionally, consider briefly highlighting recommendations for improved food safety practices.	I have accepted the required revisions and added the recommendations section. I do not have any further additions or deletions to make from the paper.
Is the manuscript scientifically, correct? Please write here.	Yes	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Reference are okay.	
Is the language/English quality of the article suitable for scholarly communications?	Suitable	
Optional/Generalcomments	The study is well-designed, and its findings contribute significantly to understanding antimicrobial resistance in foodborne pathogens. Including a more detailed discussion on specific interventions for mitigating contamination risks in the Gaza Strip would enhance the practical utility of the manuscript.	Noted.
