

Review Form 3

Journal Name:	South Asian Research Journal of Natural Products
Manuscript Number:	Ms_SARJNP_130215
Title of the Manuscript:	Preparation and characterization of some oxazolidine-5-one derivatives and evaluation of their biological activity
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The author has reported the synthesis of only five oxazolidine-5-one derivatives and the evaluation of their biological activity against only two bacterial strains <i>K. pneumoniae</i> and <i>Staph. Epidermidis</i> , in my opinion, routine work has been performed at very low scale bases and is not represented systematically.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	No, It needs to specify the biological significance of the best biologically active compound with their value.	Modified and mentioned the effectiveness
Is the manuscript scientifically, correct? Please write here.	No, It needs to be rewritten as per the journal's guideline	The research methodology has been followed.
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Is the language/English quality of the article suitable for scholarly communications?	No, It should be rewritten as per the specific journal guideline	The research methodology has been followed.
Optional/General comments	The author needs to read the specific journal before rewriting the manuscript and resubmitting it. It is better to include more derivatives to explore biological activity and also take more bacterial strain for biological study	

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
