

Review Form 3

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_130426
Title of the Manuscript:	Integrated Effect of Manures and Fertilizers with the Allelopathy of Rice Straw on the Yield Performance of T. Aman Rice
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript holds significant importance for the scientific community as it addresses a critical gap in current research by presenting novel insights and innovative approaches in its domain. The findings contribute to advancing scientific knowledge, providing a solid foundation for further exploration and potential applications.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title appears suitable but could be more concise for clarity. Here's an alternative suggestion: "Impact of Manures, Fertilizers, and Rice Straw Allelopathy on T. Aman Rice Yield" This revision retains all key aspects but simplifies the structure.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is mostly comprehensive but could be made more concise. It repeats some information, and mentioning statistical significance could strengthen the findings. The conclusion can also be expanded to emphasize how these results contribute to sustainable agriculture	
Is the manuscript scientifically, correct? Please write here.	The manuscript appears to be scientifically correct. It follows a structured experimental design, detailing the combination of rice straw, manures, and fertilizers, and reports relevant agronomic parameters like grain yield, number of effective tillers, and grain weight.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references listed are a mix of recent and older studies, with several articles from the past few years. However, there are some gaps in the references for very recent studies that could have been included, particularly from 2022-2024, to strengthen the manuscript's credibility.	
Is the language/English quality of the article suitable for scholarly communications?	The language and English quality of the article are generally understandable but could benefit from some refinement to meet the standards of scholarly communication. There are a few instances of awkward phrasing, such as "the allelopathy of rice straw" which could be clarified as "the allelopathic effects of rice straw" for better precision.	
Optional/General comments		

Review Form 3

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
