

Review Form 3

Journal Name:	Asian Journal of Advances in Agricultural Research
Manuscript Number:	Ms_AJAAR_130426
Title of the Manuscript:	Integrated Effect of Manures and Fertilizers with the Allelopathy of Rice Straw on the Yield Performance of T. Aman Rice
Type of the Article	Original Research Article

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Allelopathy is a very common and significant process in crop production. Which can cause positive or as well as negative impact on crop production. So it very important to discuss this topic for better growth and production of the crops. So, it is a significant topic selection which will be helpful for future researchers and scientists.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, it is suitable.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Yes, the abstract of the article is comprehensive and acceptable.	
Is the manuscript scientifically, correct? Please write here.	Yes, It is scientifically correct. Graphs quality is low. Its better to improve.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	References are very 28, it would be better if authors add more recent (last 5 years) references at least 40 by removing old references. It will enhance the quality of the article.	
Is the language/English quality of the article suitable for scholarly communications?	Yes, the language is appropriate.	
<u>Optional/General</u> comments	Allelopathy serves as a vital link between agriculture and ecology, offering insights into plant interactions and their applications in sustainable farming practices. Research on allelopathy underscores the importance of natural mechanisms for weed and pest control, reducing the environmental footprint of agricultural inputs. So this topic will be very useful for obtaining better growth and high yield of the crops.	

PART 2:

	Reviewer's comment	Author's comment <i>(if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Are there ethical issues in this manuscript?	<i>(If yes, Kindly please write down the ethical issues here in details)</i>
