Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	We leave a continent where we need to equip the students with skills in order to be employed or self-employed because the unemployment rate is alarming. Agriculture is one of the vehicles that that mitigate this and lead Africans to development as well. As such, well designed, developed and implemented curriculum to equip the learners with desired skills for maximum output or performance is important. Furthermore, the paper provides a clear link between curriculum content and agricultural entrepreneurship which is one of the 21 st century skills. This aspect cannot be overemphasized. In my opinion, this is an impactful write in the scientific community. Scientifically, the paper has respected the norms of a scientific paper in all its parts.	
Is the title of the article suitable? (If not please suggest an alternative title)	The title is apt for the study.	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract has mentioned all the salient elements of a good abstract, thus the abstract is good.	
Is the manuscript scientifically, correct? Please write here.	Yes.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The author is using APA 7 th edition as such the author has to respect all the punctuations guiding this referencing style from in text citations to the referencing page. However, including a fee novel additional 2020-2024 citations is an addition credit to this article. Respect the norms of end of sentence citations and citing an article inside an article you read. For example, Ndi 2017 as cited in Jitzi 2023 include the both years of the articles but remember that your reference will carry but Jitzi, S.N. (2023). Title of the article...	
Is the language/English quality of the article suitable for scholarly communications?	Yes, but need some editing.	
<u>Optional/General</u> comments	The paper is good and is going to have a great impact to the community and the scientific world in general. The author when using works of authors he should not be telling us about the methodology of the article but let the author goes straight and tell us the findings of that study. This is a scientific paper not a thesis. That I see and I have highlighted.
