Title of the Manuscript:	Antihyperlipidemic Potential of Piper nigrum: A Natural Approach to Lipid Regulation
Type of the Article	Original

**PART 1: Comments**

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
<b>Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.</b>	This manuscript holds significant importance for the scientific community as it explores the potential of <i>Piper nigrum</i> as a natural alternative for managing hyperlipidemia, a condition with increasing global prevalence. By demonstrating statistically significant reductions in SGPT and SGOT levels at specific doses, the study provides evidence of the plant's impact on liver function and lipid metabolism. Although no statistically significant changes were observed in renal function or lipid profiles, the reduction trends at higher doses highlight the plant's promise for further investigation.
