

**Review Form 3**

Journal Name:	<a href="#">Asian Journal of Biochemistry, Genetics and Molecular Biology</a>
Manuscript Number:	Ms_AJBGMB_131119
Title of the Manuscript:	Assessment of some Heavy Metals in Artisans and the Influence of Alcohol intake in three locations in Port Harcourt, Rivers State, Nigeria
Type of the Article	Original Research Article

**General guidelines for the Peer Review process:**

**Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.**

This journal's peer review policy states that **NO** manuscript should be rejected only on the basis of '**lack of Novelty**', provided the manuscript is scientifically robust and technically sound. To know the complete guidelines for the Peer Review process, reviewers are requested to visit this link:

Review Form 3

PART 1: Comments

	<b>Reviewer's comment</b> Artificial Intelligence (AI) generated or assisted review comments are strictly prohibited during peer review.	<b>Author's Feedback</b> (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The results of the study suggest that alcohol consumption is likely to increase the heavy metal accumulation in artisans in a particular locality. Further research in different localities may be done to assess the validity of this finding. Therefore, this study, ma open up scope for further research in this area.	
Is the title of the article suitable? (If not please suggest an alternative title)	Title seems a little incomprehensive. I suggest "Influence of Alcohol intake on heavy metal accumulation in artisans from three locations in Port Harcourt, Rivers State, Nigeria"	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	In abstract, the finding that alcohol influences heavy metal accumulation in the artisans is mot included. Since that seems to be the main objective of this study, focus could be given on it more.	
Is the manuscript scientifically, correct? Please write here.	Discussion part could be more elaborate by including the findings from other similar studies on correlation between heavy metal accumulation and alcohol intake. Reasons for this phenomenon may be explored further from the other similar studies. Also, the part which explains the principle of AAS seems unnecessary.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	More references of similar studies, if available, could be included.	
Is the language/English quality of the article suitable for scholarly communications?	Yes.	
Optional/General comments		

PART 2:

	<b>Reviewer's comment</b>	<b>Author's comment</b> (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
