

Review Form 3

Journal Name:	Asian Journal of Case Reports in Medicine and Health
Manuscript Number:	Ms_AJCRMH_130207
Title of the Manuscript:	Severe alveolar hemorrhage revealing systemic lupus erythematosus
Type of the Article	Case report

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	In this case report, authors present a case of a 17-year-old female presented with acute respiratory distress with massive hemoptysis and radiological and bronchoscopic (BAL) features showed diffuse alveolar hemorrhage and finally diagnosed as SLE. This presentation is rare in SLE and there are few case reports of DAH in SLE patients. Therefore, it is an excellent case report that the scientific community must be aware of the DAH in SLE and early diagnosis and treatment may save the patient's life.	
Is the title of the article suitable? (If not please suggest an alternative title)	NO Diffuse alveolar hemorrhage revealing systemic lupus erythematosus	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The characteristic presentation rather than the symptoms would be appropriate.	
Is the manuscript scientifically, correct? Please write here.	<ol style="list-style-type: none"> 1) Authors must mention the duration of the presentation. 2) Authors mention that pitting edema on the lower either due to anemic heart failure or lupus nephritis should clear it. 3) Authors mention that renal function was normal. However, during renal biopsy, it showed that lupus nephritis class 4-5. Class 4-5 is usually associated with hematuria, hypertension, RBC cast etc. 4) Do the authors exclude other causes of diffuse GGO on the CT chest? (e.g- viral, bacterial, and fungal infection) 5) Figure 1 is not clear. 6) Authors should mention the duration of treatment given and the follow-up image after how many days. 	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Yes	
Is the language/English quality of the article suitable for scholarly communications?	Yes	
Optional/General comments	I declare that I have no competing interest as a reviewer
