PART 2:

FINAL EVALUATOR'S comments on revised paper (if any)	Authors' response to final evaluator's comments
<p>First, it seems that the author(s) have taken my 1st feedback positively in some way. The abstract has now provided more clarity. The introduction itself has widened some scope.</p> <p>However, it is unclear why the author(s) does not want to include the Literature Review as critical for every scientific study. Author(s) need to appreciate the list of references (increased now) to be presented and articulated appropriately.</p> <p>Under methods, authors have attempted to include relevant discussion.</p> <p>Although it is unclear why the author(s) did not offer an explanation on the need for so many tests while sticking to a few and limited sample size (both number of banks & period).</p> <p>Moreover preferred a limited view STILL and have put it under limitation (could not understand what prevented him/them).</p> <p>There is further scope to improve the quality of presentation and articulation to make it meaningful. Full fledged efforts are missing.</p>
