

Review Form 3

Journal Name:	Asian Journal of Medicine and Health
Manuscript Number:	Ms_AJMAH_130222
Title of the Manuscript:	Antibiotic Susceptibility patterns in Adenotonsillar bacterial Isolates in a tertiary hospital in Sub-Saharan Africa
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The study is much needed considering the higher prevalence of tonsillar infection among the children This if well written and published will be much important for the scientific community	
Is the title of the article suitable? (If not please suggest an alternative title)	Antibiotic Susceptibility patterns in Adenotonsillar bacterial Isolates in a tertiary hospital in Sub-Saharan Africa  Study population and study are can be mentioned in the title. Kindly consider the title  <i>Antibiotic susceptibility and bacterial profile in adenotonsillar tissue among children undergoing adenotonsillectomy in a tertiary hospital at (study area') ----- in Sub-saharan Africe</i>	

Review Form 3

Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Abstract can be modified with proper punctuations, good English, avoiding spelling mistakes and more concisely. Conclusion can be added at the last part of abstract. Have a check on word count. Avoid repetitive sentence as written in manuscript	
Is the manuscript scientifically, correct? Please write here.	<div>1. The study looks fine. But I have a few considerations:<ul style="list-style-type: none"><li>How was the sample size determined?</li><li>How was the confounding factors addressed?</li><li>Was there any ethical clearance obtained?</li></ul></div> <div>2. Table 1 and 2 can be written in text</div> <div>3. Result part is confusing<ul style="list-style-type: none"><li>Methodology says, 3 samples were collected from each patient with total of 150.but in results, n is mentioned as 50. Was the mean of 3 calculated?. Why is the data in table given as frequency distribution?.</li><li>Table 4 is again confusing, kindly mention what the numbers explains clearly ... is it mean or anyother. Why was Chisquare test done</li></ul></div> <div>4. Mention the antibiotic dosage of each used for study</div> <div>5. Discussion part mention<ul style="list-style-type: none"><li>Limitation of the study</li><li>Highlight the main findings of the study rather than explaining all findings</li><li>Justify the main findings with literature support</li><li>Generalizability of your study</li><li>Recommendations from the study</li></ul></div> <div>6. Conclusion mention a line on the implication of the study</div>	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	<div>1. DOI of articles can be added if available</div> <div>2. Recent reference articles can be added</div>	
Is the language/English quality of the article suitable for scholarly communications?	No, this articles requires editing services	
Optional/General comments		

PART 2:

	Reviewer's comment	Author's comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
