

Review Form 3

Journal Name:	Asian Journal of Pediatric Research
Manuscript Number:	Ms_AJPR_130839
Title of the Manuscript:	Complications of Induction of Remission Chemotherapy in Childhood Acute Lymphoblastic Leukemia
Type of the Article	

PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	The manuscript provides complications and outcomes after induction chemotherapy for pediatric ALL in a single center.It shows common complications of induction chemotherapy in a single center.	
Is the title of the article suitable? (If not please suggest an alternative title)	Partly suitable. It needs to include study design, study area,and study period. Authors may replace 'complication' with 'treatment outcome'.	

Review Form 3

Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	With respect to the presented manuscript, it tried to summarize the study. However, the conclusion needs to be rewritten. The authors need to draw conclusions apart from mentioning the already presented result. What was learnt, and what recommendations will be provided based on the study results?	
Is the manuscript scientifically, correct? Please write here.	<p>The manuscript is almost correct scientifically. In addition, it presents a result that was well documented previously.</p> <p>Method section</p> <p>The collected variables need to be described fully. Additional variables ,such as patients' hematologic profiles, additional interventions given to individual patients to prevent complications, the timing of individual complications of chemotherapy, and the grading of complications, need to be included. Further statistical analysis needed to identify factors related to the outcome.</p> <p>Result section</p> <p>The authors mentioned that they collected initial clinical presentation; however, it is not provided in the results section. Authors may need to clarify the types of haemorrhage and the type of skin infection. Regarding the cause of death, the type of haemorrhage and the type of pneumonia (bacterial viral or fungal) need to be specified.</p> <p>Discussion section</p> <p>Well discussed</p> <p>Conclusion section</p> <p>Authors may need to provide recommendations apart from mentioning the presented results.</p>	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	Sufficient references, however authors may need to add recent references	
Is the language/English quality of the article suitable for scholarly communications?	Suitable. Minor corrections needed	
<u>Optional/General</u> comments	None
