

Review Form 3

Journal Name:	Asian Journal of Research in Agriculture and Forestry
Manuscript Number:	Ms_AJRAF_130105
Title of the Manuscript:	To study the constraints faced and suggestions made by the cattle rearers in management of milch cattle during transition period.
Type of the Article	Research Article

PART 1: Comments

	Reviewer’s comment	Author’s Feedback (Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	This manuscript contributes significantly to understanding constraints faced by cattle rearers during the transition period of milch cattle. The findings are practical and relevant, addressing economic, knowledge-based, and infrastructural challenges. It is valuable for policymakers, extension workers, and researchers in the livestock sector.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes, but consider revising it for clarity: "Constraints and Recommendations for Milch Cattle Management During the Transition Period: A Study of Cattle Rearers in Maharashtra."	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	The abstract is well-structured but could include: 1. Specific statistical methods employed (e.g., mean scores, frequency analysis). 2. About the practical implications of the findings.	
Is the manuscript scientifically, correct? Please write here.	Yes, the manuscript is scientifically robust. However, elaborating on statistical techniques and justifying the sample selection would further strengthen the study.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	The references are sufficient and relevant, but including more recent studies (post-2020) addressing similar challenges in dairy farming (e.g., studies on transition period management practices and dairy policy interventions) would enhance the depth.	
Is the language/English quality of the article suitable for scholarly communications?	The language is clear and concise but requires minor grammatical corrections (e.g., "during during" in results). A more formal tone in discussing implications would enhance readability.	
Optional/General comments	1. Incorporate visual aids: charts or graphs alongside tables for better accessibility.  2. Discuss the broader applicability of findings beyond the Nashik district.	

PART 2:

	Reviewer’s comment	Author’s comment (if agreed with reviewer, correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)
Are there ethical issues in this manuscript?	(If yes, Kindly please write down the ethical issues here in details)
