A minimum of 3-4 sentences may be required for this part.	**As it is mentioned in the title, it is a review paper but they have considered the review methods were the basic graph traversal algorithms such as BFS and DFS are well explained in the textbook of Data structures and algorithms and graph theory. But if considered for review means they should have taken more new graph traversal algorithms discussed by the researchers recently and they should compare it with experimentation.**	
Is the title of the article suitable? (If not please suggest an alternative title)	**The title of the article is suitable.**	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	**If they had considered 5 to 6 algorithms for review, they would have written better abstracts with more details.**	
Is the manuscript scientifically, correct? Please write here.	There is no measures have been used to check the efficiency of the algorithms.
