PART 1: Comments

	Reviewer's comment	Author's Feedback <i>(Please correct the manuscript and highlight that part in the manuscript. It is mandatory that authors should write his/her feedback here)</i>
Please write a few sentences regarding the importance of this manuscript for the scientific community. A minimum of 3-4 sentences may be required for this part.	Diabetes mellitus being a global health issue, this manuscript may have some significance in the scientific community.	
Is the title of the article suitable? (If not please suggest an alternative title)	Yes	
Is the abstract of the article comprehensive? Do you suggest the addition (or deletion) of some points in this section? Please write your suggestions here.	Results need to be clarified.	
Is the manuscript scientifically, correct? Please write here.	Seems scientifically correct if minor revision is done appropriately.	
Are the references sufficient and recent? If you have suggestions of additional references, please mention them in the review form.	A lot of references, 144 references are too much. That needs to be reduced. About 50% of references are older than 20 years. It is suggested to keep more number of references less than 10 years old.	
Is the language/English quality of the article suitable for scholarly communications?	There are some typos and janky English that need to be addressed during revision and prior to publication. Abbreviations are to be spelled out in the initial sentences. Introduction should clearly indicate the goals of this review article.	
Optional/General comments	Please address and consider the suggested revisions.
